Target Practice with Tracer (TP-T)**

35 x 228 MM AMMUNITION - TP-T

Target Practice Rounds With Tracer

The 35x228mm caliber round TP-T is a training ammunition intended for use on the 35mm KDA automatic cannon mounted on the GEPARD self-propelled anti-aircraft system and the VIFORUL towed anti-aircraft system.

The body of the training projectile is made of steel, the tip is made of aluminum alloy and the rotating band is made of special alloy.

The projectile can be used both in surface-to-air and surface-to-surface missions up to a distance of 5000m.

Main features

Safety: No explosive materials

Environment: No toxic elements

Transport/storage: According to technical specification

Technical data

Cartridge weight: 1500 g

Projectile weight: 550g

Muzzle velocity: 1175 m/s

Service temperature: -30° C to +50° C

Tracer: min. 5s

Maximum dispersion from single barrel: 1:1000

Status: supplied to Romanian MoD for GEPARD anti-aircraft system and the VIFORUL towed anti-aircraft system.
